 SIZE RATING
 (USE O.D.) (SEE
 CHART)

DIMENSIONS				Effective Area in ²	Total Area in ²
±.015 O.D.	±.015 A	B	O.A.L.		
.375	.300	.015	.100	.22	.80
.500	.420	.020	.150	.66	1.87
.625	.490	.030	.170	1.00	3.06
.750	.615	.030	.170	1.60	4.17
1.000	.875	.030	.170	3.30	6.88
1.375	1.250	.030	.170	6.60	12.15

MICRON RATING

#	NOM.	ABS.
10W	2	10
18W	5	18
25W	10	25
75W	40	75
150W	100	150

Precision built 304 stainless steel discs may be used in areas too compact for standard size filters. These discs are used to protect vital equipment from contamination. They may be used with liquid or gases within your own design configuration where corrosion and excessive temperatures are present. These discs are predominantly used in front of delicate or temperamental control equipment.

The discs are built with the same precision quality as the larger filter elements as they provide a large effective pleated filtering area. These discs may be re-used by back flushing.

A large stock of these discs are available as are our employees willing to assist you with your application.
